

Walking in the Devil's Shoes – Part 1 (The Attack on the Family)

Dr. M. John Cava

Satan came into the heavenlies after walking to and fro on the earth. His fury was raging as he addressed the gathering of his dark, demonic princes and minions, "Aren't we still angry, bitter, vengeful, and wrathful against the Almighty One who cast us out? He now prefers those confused humans made in His image. They get grace – we get nothing. He even calls them sons and daughters!" As he sneers in hate, he seethes out, "We must do more to pain the Almighty One, his children and limit their existence! Our time is short! We will strike where it hurts most. Attack the Father's family!"

Then his evil genius spoke again. "Here is the plan, we will reverse everything the Great One put in motion ... be fruitful, multiply, fill, subdue, take dominion. Ugh! But, we must make doing wrong – look right – just like we did in the garden. Ha-ha! It will work again."

Here is my five-point plan of attack ...

1. Kill the babies in the womb. Shed their innocent blood and then excuse it to inconvenience. Dull their conscience to think they are not really people until they come out. Promote a woman's right to her own body, even though now someone else lives there. Murder the unborn and eliminate millions of future sons and daughters. Soak the land in the blood of unheard screams of violence. Let's call it "women's rights" and population control for the good of all mankind. That will appeal to their twisted self-serving righteousness, and hopefully invoke the judgment of God.
2. Postpone marriage! Promote unbridled fornication and free sex then discourage marriage for later ages (30, 35, 45) or never. Yes, more sin and less children or no children. We'll promote it as the new liberty and freedom from responsibility to future generations.
3. Promote small families – just one or two children. Tell them life is harder, too expensive now. They need more time to themselves. They are sparing children the harshness of a cruel world. And oh yes, isn't over population a problem?¹ Tell them that those crazy great grandparents with families of 8-12 children were just primitive. Anyway, who could love so many kids? Keep it small. (By all means make sure they don't pray and ask the Almighty how many children He would like them to have.) Keep God out of this decision.

¹ Even though there are millions of acres of unfarmed fields and jungles around the world, and the USA pays farmers not to grow crops due to over abundance and the sea is teeming with fish.

4. Tell them Gay or Homosexuality is the new normal, not old sin. Be tolerant – where the Bible is not (say, “It’s outdated.”). Here is the story line:
 - a. Whisper they were born that way by God himself. Don’t teach them about generational sins, or spirits that attack the womb, linger around a family or friends to promote iniquities of cross-sexual identity, anger, hate, lying etc.² Keep people ignorant of truth.
 - b. Emphasize if you love someone, gay is okay. Even though it’s just personal desire versus real sacrificial love mentioned in 1 Cor. 13.³ Hide the fact that real love does not violate God’s design. Tell them this homosexual love must redefine marriage and sex life.
 - c. Though it halts the perpetuation of the human race (same sex don’t get pregnant), that this is not important. It’s still normal though it is illogical and causes problems for the next generation even when adoption is tried. But who cares?
5. For the religious minded – tell them less or no children gives them more time to serve God. Oh this is a beauty! Get them focused on themselves as God’s great portals of benevolence to the world. Don’t let them think about God’s original command to multiply, what 6-7 children might do in the generations to come or the witness of a family in unity for Christ.

By all means, we must steal, kill and destroy whatever makes for a family pleasing to the Almighty One. And if children come, turn their hearts away from their fathers and mothers. Use media to make the fathers out to be idiots and the mothers to be controlling ogres. Use TV, movies, and Internet shows to promote disrespect for authority with no disciplines or ramifications for misbehavior.

Oh and let’s not forget to get family and life degenerating programs into the educational systems (starting in kindergarten). Then, we have them for 12 -16 more years of values programming. Yes, we will subdue their minds with confusion, delusion, selfish values tricking them to believe its free choice. Instead of them being reigning sons of God, they will be our robots. We will call it, “Being Progressive.”⁴

² Some cultures have their witch doctors attach a spirit to every child in the womb to steer its destiny. (Interview with Nigerian pastor.) Though God just made them humans – a lot of other influences affect identities (such as same sex sports buddies, early age abuse etc.) and gender preferences.

³ In this famous definition of love, romantic love is not mentioned. Rather, it is sacrifice and preference for other’s wellbeing.

With a fiendish smile and a wicked glint in his eye, Satan ended his address, "I am returning back to the earth to continue devouring lives and managing our forces. By the way, I have experimented in the above methods and they are already working. Let's make it all out war against the Father's family! Who can stop us?"
